PROFESSIONAL SUMMARY

AI Data Science undergraduate with hands-on experience building and shipping end-to-end ML applications — from data collection and model training to deployment. Proficient in Python, SQL, TensorFlow, and Web Development, with additional experience in REST API integration, UI/UX prototyping, and cloud deployment. Proven track record across hackathons and national challenges, translating real-world problems into working, production-ready solutions.

EDUCATION

Saveetha Engineering College, Chennai 2023 – Present
B.Tech. Artificial Intelligence and Data Science **CGPA: 8.0 / 10**
4th Year, 7th Semester

TECHNICAL SKILLS

Programming Languages: Python, C, SQL
AI / ML & LLMs: Machine Learning, Deep Learning, NLP, Computer Vision, LLM API Experimentation, Scikit-learn, Tensorflow, Pandas, NumPy
Product & Prototyping: Rapid POC Development, User Stories, Product Thinking, Market Research, Competitive Analysis
UI/UX: Figma, Framer, Canva, Wireframing, Interaction Flow Design, Usability Testing, User Research
Web & APIs: HTML, CSS, REST APIs, API Integration, Django
Cloud & DevOps: AWS, Docker, Git, GitHub
Developer Tools: Figma, Notion

EXPERIENCE

UI/UX Designer Intern – Arjun Vision Tech Solutions, Guindy Jun 2024 – Jul 2024

- Owned end-to-end UI/UX prototyping in Figma for **Genie** (e-Sevai app) — designed login, dashboard, and booking interaction flows, delivering a production-ready prototype with validated usability across 3 core screens
- Collaborated with product and development teams to translate wireframes into developer-ready specs, ensuring design consistency across the app

PROJECTS

ATHLENTIQ — AI-Powered Sports Performance Analyzer Nov 2025
Python, TensorFlow, Google ML Kit, Kotlin, Room (SQLite) DB, Mobile App, Rapid Prototyping

- Ideated, prototyped, and shipped a Mobile app for real-time player performance analysis end-to-end [**~87% accuracy**]
- 2nd Runner-Up** at Hack.io Hackathon, KSSEM Bengaluru (60+ teams)

ECO-NAV — AI Maritime Route Optimization May 2025
Python, PyTorch, REST APIs, Pandas, NumPy, Real-Time Weather & Ocean Data

- Ideated, prototyped, and shipped an AI-powered mobile app for real-time maritime route optimization, integrating live weather and ocean data via REST APIs
- Assessed feasibility, defined acceptance criteria, and documented outcomes; **National Finalist**, Maritime AI Challenge (200+ teams)

SPORTS — Community Sports & Tournament Platform Dec 2024
Full Stack Development, HTML5, CSS3, JavaScript, Firebase, REST APIs, User Research

- Built and deployed a full-stack tournament management platform serving **50+ users** — designed interaction flows, wrote user stories, and implemented RESTful architecture with real-time Firebase integration

FLOODGUARD — ML-Based Flood Prediction System Nov 2024
Python, Scikit-learn, Pandas, NumPy, Matplotlib, Predictive Analytics, Real-Time Data

- Trained an ML flood prediction model on historical and real-time datasets achieving approx. **85% accuracy** for early warning and disaster preparedness applications.

ACHIEVEMENTS

- Final Winner** – NextGen Hackathon, NIT Trichy
- 2nd Runner-Up** – Hack.io Hackathon, KSSEM Bengaluru (60+ teams)
- National Finalist** – Maritime AI Challenge, Eco-Nav (200+ teams)
- Certifications: **AWS Cloud Practitioner Essentials** (Dec 2024) | **Microsoft Azure Learning** (Sep 2025) | **Coursera: Machine Learning** (May 2025) | **NPTEL: IoT** – 84% (Oct 2024)
